

TEU Survey Report for Alumni Surveys

Data Collected Summer 2022

(as part of the 2021-22 data collection cycle)

Administration Dates & Population Surveyed:

Alumni 1-Year Post Completion Survey: Administered every summer. Most recent administration date Summer 2022. Data reported for initial and advanced program candidates who **completed in 2020-21** after they were employed for 1 year post program completion.

NOTE: candidates who completed programs in 2021-22 have not been employed for one year, thus do not meet survey criteria, but will be surveyed in the next cycle (Summer 2023). Alumni survey is always 1 year behind.

Alumni 3-Year Post Completion Survey: Administered every summer. Most recent administration date Summer 2022. Data reported for initial and advanced program candidates who **completed in 2018-19**, 3 years post program completion.

Visuals retrieved from data dashboard:

<https://public.tableau.com/app/profile/tiffany.fuzak/viz/programdash/Welcome>

Cohorts included in this evidence package:

2020-21 (Alumni 1)

2018-19 (Alumni 3)

Data are disaggregated by initial and advanced program levels.

Analysis: Results were reported to the Teacher Education Council December 2022 and at the Program Improvement Retreat January 2023. Overall findings indicate over 90% of alumni felt prepared in all areas related to content, pedagogy, technology, diversity, and professional responsibility. The area of diversity has increased in recent years, likely due to unit-wide efforts, including professional development for faculty. In addition alumni consistent report “professional responsibility” is an area of strength relative to other criteria.

Questions about surveys deployment can be directed to Tiffany Fuzak fuzaktd@buffalostate.edu.

Questions about survey content or data use for program improvement can be directed to Dr. Shannon Budin gormlese@buffalostate.edu

Alumni-1 Year
